30<sup>th</sup> January 2024 **DAILY MARKET REVIEW** 

## **ECONOMIC NEWS**

- ✓ Summary of Monetary Policy Statement-MPS
- ✓ Real sector Incoming data continues to support the Committee's earlier assessment of moderate economic recovery, primarily led by the agriculture sector. Real GDP growth projection remains unchanged in the range of 2% to 3% for FY24.
- ✓ External sector CAB-S in December 2023 helped bring down the H1FY24 deficit by 77% to \$0.8bn. The exports registered a growth of 5.3% y/y during H1FY24, supported by growth in rice and volume of HVA textiles. At the same time, imports declined considerably due to lower international commodity prices, better domestic crop output, and a decline in oil import volumes.
- Fiscal sector The fiscal position continued to improve during 4MFY24. The overall deficit declined to 0.8% of GDP from 1.5% last year, while the primary surplus increased to 1.4% as compared to 0.2% last year. This improvement is mainly led by a significant increase in revenue collection and somewhat restrained expenditures. FBR tax collection grew by 30.3% during H1FY24 amidst gradual recovery in economic activity and continued impact of taxation measures, while non-tax revenues also remained strong.
- ✓ Money and credit M2 growth, which has been hovering around 14 percent in FY24, surged to 17.8% y/y as of end-December 2023. The improvement in the external position has increased the NFA of the banking system. In contrast, growth in NDA of the banking system decelerated, primarily due to a slowdown in PSC.
- Inflation outlook The MPC noted that both food and core inflation are moderating for the past few months. This trend reflects the positive impact of tight monetary policy stance duly supported by ongoing fiscal consolidation, lower global commodity prices, and improved domestic crop output and supplies. However, the positive impact of these developments is being diluted by sizable adjustments in administered energy prices, especially from November 2023 onwards. In this regard, the Committee emphasized on reforms to address underlying structural issues, especially those in the energy sector, to achieve price stability on a sustainable basis. Incorporating the inflation in H1-FY24, expected significant decline in the second half, and the evolving risks, the MPC expects average inflation to fall in the range of 23% 25% in FY24 and continue to trend down noticeably in FY25.
- ✓ Conclusion After observing all the above economic indicators, MPC decided to maintain the PR at 22.00%.
